

# Endure

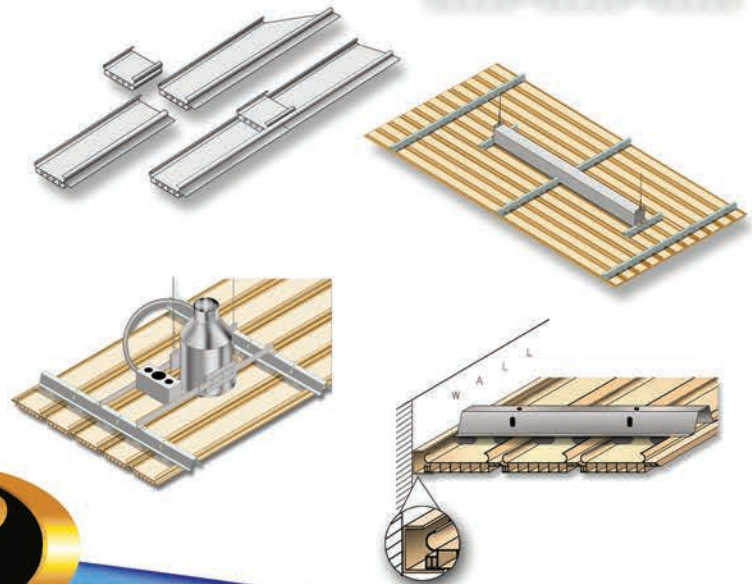

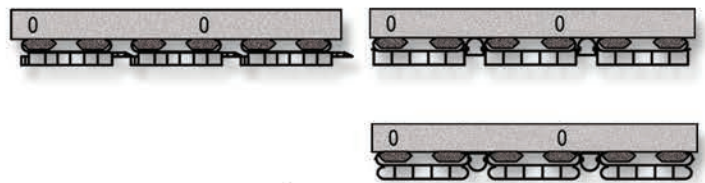

## Engineered Polymer Canopy Ceiling System

Rulon's **Endure** suspended linear canopy ceiling system has become a specified favorite for ceilings and canopy ceilings in adverse exterior environments as well as for modern interior applications. **Endure** performs well in indoor swimming pools, water treatment plants, exterior store canopies and many other applications. **Endure** offers a clean, smooth, modern appearance with rugged durability. It has been proven tough enough to survive hurricane conditions where other ceilings have failed.

**Endure** strips are extruded from an engineered polymer. It is inert to the harsh, moist weather conditions that can greatly shorten the useful life of metal, EFIS drywall or other synthetic material ceiling products.

When service life is completed, **Endure** strips are completely recyclable.

Contractors appreciate the quick and easy installation the **Endure** system offers. The strips are easy to cut and snap quickly onto the metal carriers. Investigate this high-quality and economical product and enjoy its many benefits for your next project installation!

**RULON INTERNATIONAL**

## Standard Colors

**Endure** is available in the standard and special colors shown. Premium colors can be extruded on large orders.

### Virtually Maintenance Free

**Endure** ceilings offer a smooth, modern, water-repellent surface, which cleans easily with a damp cloth or power washing. **Endure** is resistant to chemical attack, and the ceiling choice for high humidity and corrosive conditions such as indoor swimming pools, seashore environments, and exterior store canopies.

### Long Lasting Durability

**Endure** is made from pigments and resins which are mixed prior to extrusion producing uniform color throughout the profile. There is never a need to paint or refinish **Endure**. The flexibility and resilience of **Endure** provides excellent protection from dents, dings and damage by abusive actions.

### Easy Installation

**Endure** strips are lightweight and readily handled without risk of product damage. **Endure** permits easy installation of lighting, air handling units, sprinkler heads, and other ceiling penetrations. The natural insulating property of **Endure** allows high efficiency when used as a return-air plenum.

### Removability For Access

**Endure** ceiling strips can be removed and replaced with little effort, allowing complete access to plenum areas above. **Endure** strips retain their shape after repeated removals - eliminating rattling and vibration.

### Economical Pricing

**Endure** ceiling systems are price competitive when compared with linear metal, EFIS, drywall gypsum or other materials. **Endure** is quick and easy to install—looking new for years after installation. All this, combined with a clean modern appearance, makes **Endure** a high-value worthwhile ceiling system choice.

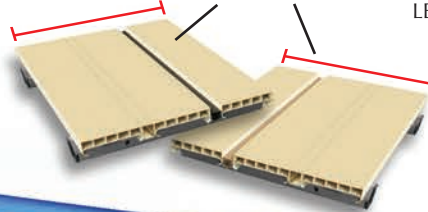

### 8" Module Option

By utilizing the 865 flush spacer in alternating reveals, an 8" module can be achieved. Also, try alternating different colors between **Endure** strips and spacer for a unique look.
