CURVALON

Custom Curved Wood Panels

- Custom convex and concave layouts to meet the design requirements for any curved panels
- Panels consist of natural wood veneer applied to a flexible engineered substrate and shaped to custom radii
- Custom panel sizes available (Max. 4'W x 10'L, dimensions follow curvature)
- All Curvalon panels are finished with custom stains, clear sealers, or color treatments

FIRE RETARDANCY

Curvalon panels can be manufactured to meet ASTM E-84 Class 1 or A fire retardancy.

CUSTOM DESIGNED

With custom concave and convex radii and multiple colors available, we have a solution for every curved panel application.

EASE OF INSTALLATION

Through the use of eye-screws and interconnected components, Rulon panels are easy to install.

ACOUSTICAL PERFORMANCE

Curvalon panels are manufactured without acoustics in mind as they are designed to be an aesthetic focal point of an occupied space. Curvalon is acoustically reflective.

SUSTAINABLY MANUFACTURED

Curvalon Panels conform to several sustainability standards including FSC, LEED v4, WELL, and HPD.

THIRD PARTY TESTING

Independent lab testing has been completed for a variety of certifications including fire-performance, acoustic rating, material composition, and indoor air quality.

CURVALON

Our **Curvalon** panels feature a flexible core that allows for custom concave or convex geometries to be achieved.

FIRE RETARDANT

SUSTAINABLE

PANEL FINISH SAMPLES

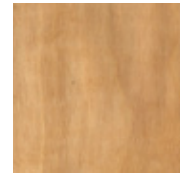

In addition to the wood selections below, Curvalon panels receive custom stains, clear sealers, or color treatments, creating a high quality attractive panel finish. Finishes are water-based, UV-cured, and low VOC.

Cherry

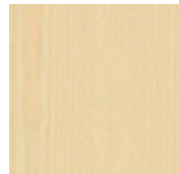

Maple

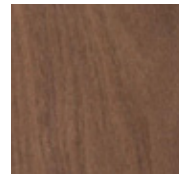

Anigre

Beech

Ash

Walnut

Bamboo

Oak

* custom veneer species are available upon request
