

TavaPerf® acoustic wood panels by Tavapan provide a premium natural finish for ceilings and walls. The systems simple ceiling installation allows use of 15/16" HD grid, allowing unlimited access to the ceiling above. Can be installed either as lay in or vector shadow style. Wall panels can be installed on wood or steel furring. All panels include a black acoustic liner applied to the back.

Panels are precision manufactured in a range of standard sizes or custom made to your specs. Several profiles of perforations are available to meet the NRC rating required, from micro-perforations to slots for effectively controlling sound requirements.

Available finishes also include scratch resistant laminates or Low VOC lacquered MDF. Panels are easily cut/drilled to fit on site penetrations. Additional sound insulation may be added to increase the absorption rates.

Standard Perforations

*** Custom Perforations Available**

Standard Veneers

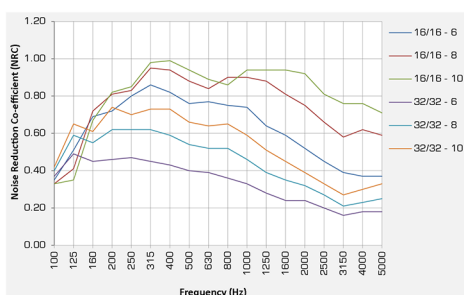

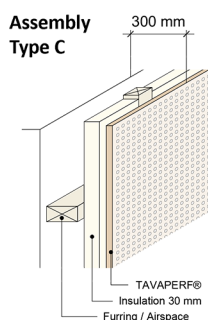

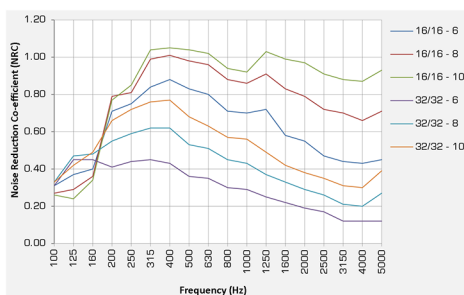

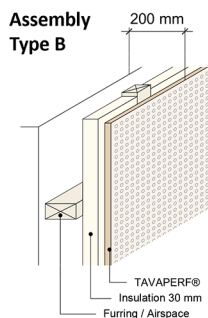

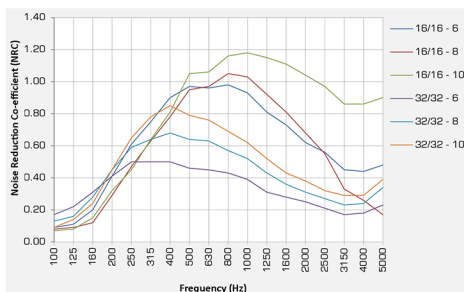

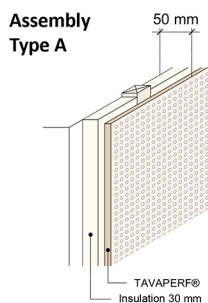

*** Custom veneer & HPL options available**

Specifications

Core:	MDF (NAUF)
Thickness:	¾"
Panel sizes:	2' x 2', 2' x 4', Custom
Fire Retardancy:	CAN/ULC S102
Weight:	2 lbs/ft ²

For Walls

LEED Credit Opportunities

Shadow Edge

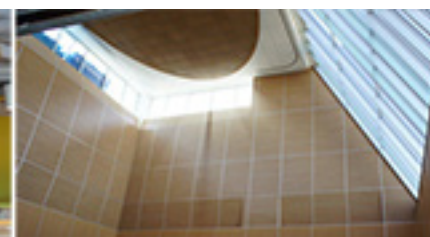

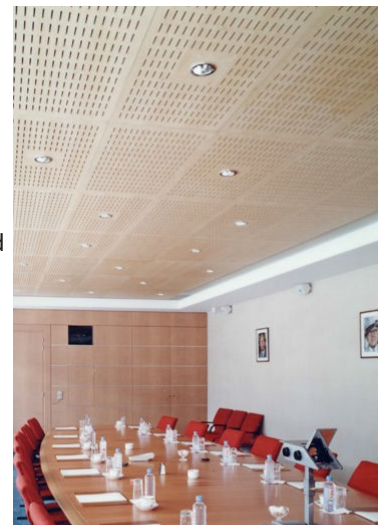

Installation

TavaPerf® is ultimately designed for use with 15/16 HD ceiling grids offering easy no hassle installation, by lay-in or vector shadow styling.

TavaPerf® acoustical wall panels are designed to be easily installed using Z-Clips or a custom nailing clip.

TavaPerf® ceiling and wall panels can be easily field cut using traditional woodworking tools.
